

# ENERGY REBATES

SU780XLE | Upright Ultra-Low Temperature Freezer

You can earn \$1000's in utility rebates and reduce ultra-low freezer energy consumption by up to 75% with the Stirling Ultracold SU780XLE

## Remember when you changed from incandescent bulbs to energy-saving bulbs?

Then you know that U.S. electric utility providers reward their customers for adopting energy-efficient technologies that reduce cumulative power usage. Since 2017, the Stirling Ultracold SU780XLE has been the top-rated ENERGY STAR®-certified ultra-low freezer on the market, which is why many utilities offer prescriptive energy incentives to buyers of this innovative upright model.

Major U.S. utilities have recognized the SU780XLE's dramatic energy savings and provided many of our customers with \$1000's in custom utility rebates for replacing standard cascade-compressor ULT freezers with our freezers, powered by the revolutionary free-piston Stirling engine.

## ULT freezer replacement = huge energy savings for research labs and biorepositories

Many research facilities are operating 100's legacy cascade-compressor ULT freezers 24/7/365. Considering that each of these units consumes the equivalent electric power of an average U.S. household, it's not surprising the electric utilities have taken an interest in providing cash incentives to organizations who buy the energy-saving SU780XLE from Stirling Ultracold.

## Significant rebate potential

While rebate award will vary depending on your local utility, Stirling freezers have qualified for up to \$3000 in utility

energy incentives per unit. Based on this and quantity of units replaced, below are projected cash incentives that could be available to your organization with the purchase of SU780XLE upright freezers.

### Projected Utility Rebates\* for ULT Replacement with SU780XLE

Rebate Amount	10 ULT Freezers Replaced	25 ULT Freezers Replaced	50 ULT Freezers Replaced
\$1,000/Freezer	\$10,000	\$25,000	\$50,000
\$1,200/Freezer	\$12,000	\$30,000	\$60,000
\$1,500/Freezer	\$15,000	\$37,500	\$75,000

\*Estimates based on typical rebates received by Stirling Ultracold customers from utilities and energy providers for purchasing SU780XLE freezers. Contact us for specific rebate information.

## How to apply for your utility energy incentives

ENERGY STAR-certified Stirling Ultracold upright ULT freezers usually qualify for "prescriptive measure" rebates and it will not be necessary to submit a "custom measure" application to qualify in most cases.

Contact your Stirling Ultracold representative about coordinating the rebate incentives application process with your local utility.
