

# Automated, water-free vial thawing systems

SAFE THAWING FOR CRYOPRESERVED  
BIOLOGIC MATERIALS

ThawSTAR<sup>®</sup> Automated Thawing Systems were designed to provide a water-free, uniform, and reproducible warming profile for frozen biologics suspended in various primary containers. The ThawSTAR technology provides sensor-based thawing algorithms designed to deliver consistent thawing outcomes.

## ADVANCED THAWING VALUE:

- ⦿ **Automation and standardization** – ThawSTAR products ensure consistent thawing results with reproducible algorithms designed to eliminate manual processing.
- ⦿ **Reduced contamination exposure** – ThawSTAR solutions are 100% water-free, eliminating sample contamination risks often associated with water baths and other thawing systems.
- ⦿ **Programmed precision** – For optimizable ThawSTAR models, thawing algorithms may be customized to the specific container and biologic. Qualified BioLife technicians will tailor the program to maximize thaw outcome.
- ⦿ **Qualifiable** – ThawSTAR Systems are qualifiable and can be scaled into end point of use facilities.

**Figure 1:** Thawing of Peripheral Blood Mononuclear Cells

**Figure 1:** Cell viability (left panel) and recovery (right panel) of PBMC were measured using trypan blue exclusion on a hemacytometer. Recovery is the number of viable cells post-thaw as a percentage of the pre-freeze viable cells. No statistical difference in viability (2-way ANOVA with post hoc Sidak test) or recovery (unpaired two-tailed t-test) at  $p < 0.05$  were found. Data courtesy of Dr. Mars Stone at the Blood Systems Research Institute.

## Available in various models to support R&D, commercial manufacture, and end point of use.

Product Family	ThawSTAR <sup>®</sup> CFT		ThawSTAR <sup>®</sup> CSV		ThawSTAR <sup>®</sup> AT			
	ThawSTAR CFT1.5	ThawSTAR CFT2	ThawSTAR CSV2	ThawSTAR CSV5	ThawSTAR AT1	ThawSTAR AT2	ThawSTAR AT6	ThawSTAR AT10

### Additional ThawSTAR<sup>®</sup> Transporters

ThawSTAR Transporters were designed specifically to move ultracold samples from their long-term storage freezers to the thawing system. Comprised of an insulative foam layer and lid with space for dry-ice and various samples, ThawSTAR Transporters are an ideal temporary holding solution until all samples have been thawed and processed. Not compatible with CellSeal vials.
